---

The Pharmacy has alerted us that they have a shortage on the EPI and Atropine Abbojects. Until the abbojects become available again the pharmacy will use the remainder of what they have in stock and then begin putting together vial kits for each which will be stocked in the Med Boxes and Med Acudose machine for those doing one for one.

***MWHC Pharmacy: We have sufficient supply of epinephrine at the moment so they should not see those from our hospitals yet. As for the atropine we will start putting a few kits in the boxes that come in for restocking. Atropine is rarely used and so they should not see that many in boxes unless they all expire out.***

**ATROPINE 1MG/10ML KIT (DUE TO ABBOJECT SHORTAGE)**

-----  
**CONTENTS:**

**1 ATROPINE 1MG/1ML VIAL    EXP: \_\_\_\_\_**
