

## September 27, 2022 Protocol Updates

1. Allergic Reaction/Anaphylaxis protocol: in the main section of the protocol, pediatric Benadryl dosing corrected to be a max of 25 mg, as was listed in medication reference section
2. Supraventricular Tachycardia (including Atrial Fibrillation) protocol: The Cardizem dose was clarified in medication section to be “max total combined dose of 45 mg”
3. Overdose/Poisoning/Toxic Ingestion protocol: Poison Control Center number was updated to 800-222-1222
4. Reference section: Epi infusion chart header corrected from 60 gtts/ml to 15 gtts/ml
5. Trauma section: Broken QR code in Diving emergencies protocol was repaired
6. Medical section: Broken QR code in Hospice protocol was repaired
7. Medication Reference section: Removed Tylenol and Motrin from the medication section as we no longer have the Mass Gathering protocol
